

#### REFERENCE CASE: Hospital Lillebaelt - Middelfart

The catering facilities at Middlefarts' hospital handles meals for more than 100 bed places and they serve meals every day for more than 250 employees. The Longopac system Maxi and Mini are the versions selected and used in both kitchen/preparation area and in the canteen.

The "endless bagging system" enable us to make exactly the garbage bag needed according to the volume of waste – we no longer use more material than necessary.

Another advantage of the Longopac Stand, the bag holder of the Longopac, is that it can be moved around at your convenience.

"My girls have expressed that this system is far more flexible and easier to close without excessive strength, thanks to the cable ties that comes included in the package – in other words it is more user-friendly for us professionals", says purchase manager Laila Stenholdt Kristensen. She continues; "My team of co-workers likes the system due to its user friendliness and professional design"
