Classic Mini are equipped with an ABS/PC base and a PP cassette holder. Maxi and Recycling are equipped with a base and cassette holder of PP plastic. Both stands are fitted with aluminium legs and galvanised steel wheels. Both are also available with stainless steel legs, wheels or plastic feet.

Classic Recycling is primarily used when handling of plastic, paper or other material in large volumes that will then be compressed for recycling. This stand is available in Maxi and used with the 160 m Longopac Ultra Lean cassette, which is available in the standard or perforated version.

Classic Mini and Maxi are also available in our Food version, intended for use in the food industry.

Both have a polypropylene base and cassette holder with blue metal-detectable material as well as stainless steel legs and wheels.

As part of further improving waste sorting and waste management, Paxxo has designed a smart and flexible signage system for both Classic and Dynamic.

The signs are easily mounted on the stand and simplifies the understanding of waste sorting, i.e. at a sorting station. The signs fits all Classic and Dynamic and wall mounted stands except Dynamic Mini. The signs are available in two sizes; A4Portrait and A5Landscape.

The stickers to fit the signs are delivered in an editable PDF file that can be customized according to your customers' needs. The stickers are simply printed on a laser printer. You can also get the ready signs directly from Paxxo.
