

# Longopac® Bin

– simply smarter

Practical and  
hygienic solution  
for efficient waste  
management in  
public areas

- Hygienic
- Efficient
- Environmentally friendly

## HYGIENIC

- No waste ends up outside the bag.
- No waste on the floor – not even during bag change.
- No contact with the waste.

## EFFICIENT

- Loaded with a 60 metre bag cassette.
- New bag always in place.
- Bag always securely sealed.
- Quicker bag changes.
- Flexible service intervals.
- Less cleaning.
- Always 100% fill level.

Longopac - with 50 % recycled material

## ENVIRONMENTALLY FRIENDLY

- The Longopac bag material is made from 3-ply polyethylene, which combines low consumption of raw material with a high level of strength.
- Customers can calculate their environmental saving using the Paxxo CO<sub>2</sub> calculator and we are able to issue a CO<sub>2</sub> emission certificate of the CO<sub>2</sub> saving.
- 80% lower CO<sub>2</sub> emission compared to traditional waste bags.
- 50% recycled material in all cassettes (excluding Food or Pharma)

### Standard colour codes

|   |   |   |     |
|---|---|---|-----|
|    | 0 |    | 5   |
|    | 1 |    | 6   |
|    | 2 |    | 7   |
|  | 4 |  | 8PU |

## HOW IT WORKS

### Step 1:

The bag cassette is sealed at one end with a cable tie. Once the bag starts to fill up, or when you want to replace the bag, all you have to do is pull it down and new material is dispensed from the cassette, making the bag longer.

### Step 2:

To make a new bag, pull down the bag material and seal it at the top with a cable tie.

### Step 3:

Attach another cable tie above the first one and cut off the bag material between the ties. The entire process takes no more than 30 seconds!

Bin Bullet

Bin Confer

Bin Welcome

## Longopac Bin facilitates waste sorting and waste management in public areas in a neat, simple and environmentally friendly manner.

**Bin Bullet** is a practical and hygienic solution for efficient waste management. The unique bagging system also makes the Bin Bullet economical and environmentally friendly, as well as easy to use and time-saving.

The bin is easy to remove and bag change is quick. Thanks to its stylish design, the Bin Bullet blends into public environments such as restaurants, cafés, hotel lobbies and waiting areas.

**Bin Confer** has a stylish and flexible design that comes as a flat-pack. The stickers pasted on the different containers can be easily modified for local printing.

*(Bin Confer is only developed for our export markets)*

**Bin Welcome** is a mobile solution used for disinfection of e.g. hands, baskets and carts at entrances or public areas. The cabinet comes in a flat package and is easy to assemble and comes complete with a container that consists of 1000 wet wipes that are effective against E.coli, Listeria, Salmonella, MRSA & viruses (incl. COVID-19).

Bin Confer and Bin Welcome are equipped with a decal on the top with information about what should be thrown in each aperture.

Both Bin Bullet, Confer, Multi and Welcome are loaded with Longopac cassette Mini, which is available in different strengths and colours.

The cassette is also available in 100% compostable material for food waste; Longopac Biodegradable.

What all cabinets have in common is the Longopac system. The system really comes into its own when sorting at source, since it is possible to change the bags for all fractions and only use the exact amount of film needed for each fraction. The cabinet is emptied without half empty bags being thrown away.

**Bin Multi** is a modular system for waste management and sorting at source. The system can be combined with different fractions; the cabinets are customised for 1-4 fractions. Bin Multi is suitable for areas that require efficient sorting at source, such as corridors, kitchenettes and conference rooms. The cabinet can, of course, be placed in any dry environment.

It is also available in the very popular, special version **Bin Multi Cups** for disposable cups.

# Solutions for indoor use

Bin Multi 1

Bin Multi 2

Bin Multi 3

Bin Multi 4

Bin Multi Cup

Bin Lavello

Bin Box

**Bin Multi** does not take up much more space than a large waste basket but the Longopac bagging system that is used inside all the cabinets makes waste management more efficient and reduces both costs and environmental impact.

Each piece of furniture is equipped with a decal on the top with information about what should be thrown in each aperture.

**Bin Lavello** with sink, and **Bin Box**, which can be used for e.g. glass, and **Bin Multi Cup** can easily be combined with other Multi cabinets.

The product is made in Sweden. The material is melamine and high pressure laminate. The modular pieces of furniture are available in the colours white and grey.

Other colours are available by special order.
