

Longopac®

– endlessly clever

- Hygienic
- Efficient
- Environmentally friendly

**Innovative
waste handling and
packaging solutions**

A selection of photos from the production facility in Malmö, Sweden.

Longopac Features & Certifications

LONGOPAC MINI

Diameter: 357 mm
 Standard: 60 meter
 Strong: 45 meter
Clips
 Standard: 75 pcs
 Strong: 60 pcs

LONGOPAC MIDI

Diameter: 465 mm
 Standard: 85 meter
 Strong: 70 meter
Clips
 Standard: 100 pcs
 Strong: 90 pcs

LONGOPAC MAXI

Diameter: 570 mm
 Standard: 110 meter
 Strong: 90 meter
Clips
 Standard: 130 pcs

SUSTAINABILITY

Paxxo's main products contain at least 50% recycled material or bio-material (*does not apply to Food or Pacto*). All production takes place with fossil-free electricity in Sweden.

QUALITY

Length and strength measured with Dart Drop are guaranteed. Each Longopac film roll is tested according to the Dart Drop method. Via a reference number, which is printed on both packaging and plastic film, we have traceability all the way to the original production (batch).

STRENGTH

Paxxo measures the strength of the plastic film according to Dart Drop and guarantees measured strength for up to two years. The most common scientific way to measure plastic film is to apply the Dart Drop method. The implementation can be seen in its entirety on the website.

VERSIONS

Food

This bag cassette is certified by Normpack (Swedish Code for Food Packaging Materials) for the handling of food and pharma. Food can be packaged for re-use and Pharma for bulk handling.

Odour control

The black odour-control cassette is an extra airtight bag cassette for Longopac Stand. With this cassette you can control odours associated with waste such as diapers.

Sterile

Longopac Mini bag cassettes can be gamma sterilized and are packaged in air tight protective bags.

ESD

Electro Static Discharge bag cassettes are available in areas that require anti-static material. The surface resistivity value is 1.0E +10 Ohm and is guaranteed 12 months from production date.

Perforated

This version is only available for Longopac Maxi. The bag cassettes is used for recycling of plastics to enable better result in compactors. There are six perforations every 25 cm.

Pacto

The transparent Pacto material is weldable and can be used for closure and sealing to prevent permeation of environmentally hazardous waste and odours.

Biodegradable

The Bio bag cassettes are available for either the disposal or composting of food waste and other organic waste. Longopac Biodegradable Industrial Compost (IC) bag cassette is developed for waste that goes to landfill and organic waste treated in industrial composting.

The material is certified for industrial compost and biodegrades in six months at 60°C. It is both stronger and cheaper than our Home Compost (HC) cassettes.

The Longopac system is available in a variety of designs to suit different purposes. Paxxo also offers metal detectable solutions for environments that require it.

Hygienic • Efficient • Environmentally friendly

The unique Paxxo Longopac® system enables smarter waste handling and innovative packaging solutions for a better working environment for professionals worldwide. Longopac is hygienic since the bags are replaced and sealed from the outside – there is no contact with the waste.

Longopac is based on an extremely thin and strong 3-layer polyethylene material. The bagging material is folded into compact cassettes in specifically developed machines. Longopac gives advantages in the form of efficient and time saving handling, low material consumption and low transport costs.

Longopac is available in many different colours and strengths as well as in Mini, Midi and Maxi size. Longopac is certified to be used in different kinds of handling within: Odor Control, Biodegradable, Food, ESD, Sterile as well as with different strengths on the bag cassette.

Colour codes

	0		5
	1		6
	2		7
	4		8PU

The Longopac bag cassette comes in a variety of strengths and colours.

HOW IT WORKS

Step 1

The bag cassette is sealed at one end with a cable tie. Once the “bag” starts to fill up, you just pull it down and new material is drawn from the cassette to make the bag longer.

Step 2

To make a new bag, pull the material down and seal it at the top with a cable tie.

Step 3

Add another cable tie above the first one and cut the bag material off between the two cable ties. The entire process takes less than 30 seconds!

PAXXO AB

Paxxo is a Swedish based packaging company with more than a 40-year history.

Our business concept is to manufacture the unique endless bag system Longopac that, thanks to innovative, smarter waste management and packaging solutions, creates a better working environment in many industries.

Our success has been possible because our products offer rational handling, a better working environment and low environmental impact. The unique Longopac system is today sold by certified partners in more than 40 countries.

Headquarters for sales, production and R&D is located in Malmö, Sweden. Sales office and distribution warehouse is located in Atlanta, Georgia, USA.

PAXXO is certificated in compliance with ISO 9001 and ISO 14001. We are continuously making our company greener and lowering our products' environmental impact.

Since 1992 Paxxo has a policy of donating 1 % of profits after taxes to charity.
